

How IWD voip services work

IWD Voip Call

International and local calls are now made cheaper and easier with our mobile dialer app. The IWD Mobile dialer app is available on Android, iOS, and Windows. Downloadable from the Apple store and the Google Play store, CALLJU.

Mobile dialer app:

Mobile VoIP is an innovative way of using your mobile phone to make calls over the internet instead of the traditional mobile operators. This method helps to save money drastically. With our Mobile App, you can receive and make free or cheap VoIP calls from your mobile phone anywhere in the world.

It requires and works with a moderate mobile internet connection.

Calls made with our mobile app consume a few kilobits.

(A) Recharging the Mobile dialer app:

The mobile dialer app account is rechargeable. The recharge vouchers are available on our online store, and at our agent stores. The mobile dialer app can also be recharged directly from the user's account with the credit card. Login into your account and select the option "Buy credit".

(B) Billing and tariff structure

The IWD Mobile dialer works provided you have an internet connection.

Download and activate our mobile dialer app, suggest the same to your friends, relatives, co-workers, etc., and enjoy IWD's high-quality calls.

(a) You can choose a pay-as-you-go calling plan. No contract, no monthly fees.

There is no setup or disconnection fee, no hidden fees, and no other enticing offers. It requires a prepaid credit recharge.

Your credit balance is only billed according to the destination rate and the minutes of the

call.

(b) Monthly plan: A flat rate that provides you with several minutes of call for a very convenient prepaid monthly subscription fee.

(c) App to App unlimited minutes: This option requires a \$5 USD monthly credit recharge for the calling app only. The receiving app may not have any credit balance.

(C) How to use the IWD mobile voip call

- download and install our mobile dialer app from the Google Play or from the Apple Store.
- obtain the mobile dialer app user ID from our agent store.
- unlock the mobile dialer app with the ID
- purchase the recharge voucher card/PIN from our agent store.
- open the mobile dialer app, and add credit with the recharge voucher.
- you can also recharge directly with the agent without purchasing the voucher.
- you can also add credit from your mobile dialer personal online account with a credit card (log in with your user ID).
- you can monitor your credit balance from the mobile dialer app or from the online account.
- you can transfer part of your credit to another mobile app
(this is done from the mobile app).

(D) Using your mobile dialer app to receive outside calls:

- you need a DID number activation. This is a worldwide virtual number.
- request for activation at our agent store.
- whoever calls the number is charged the local rate according to their local provider.
- No roaming, no extra charge for the receiver or for the caller
